Course Title.....

Course Code.....

... Understanding of elementary physics in the areas of (i) mechanics, (ii) fluid mechanics, (iii) thermodynamics, (iv) waves and optics, (v) electromagnetism, and (vi) modern physics, for application to medical science and related fields......

### 2. Course-level Learning Outcomes: CLOs

By the end of the course, students are able to

CLO1 give qualitative explanations for a variety of natural phenomena from everyday life using basic physics principles in the areas of (i) mechanics, (ii) fluid mechanics, (iii) thermodynamics, (iv) waves and optics, (v) electromagnetism, and (vi) modern physics.

CLO2 apply appropriate physics concepts to analyze introductory level physics problems in the areas of (i) mechanics, (ii) fluid mechanics, (iii) thermodynamics, (iv) waves and optics, (v) electromagnetism, and (vi) modern physics.

CLO3 use appropriate mathematical techniques and concepts to obtain quantitative solutions to introductory level physics problems in the areas of (i) mechanics, (ii) fluid mechanics, (iii) thermodynamics, (iv) waves and optics, (v) electromagnetism, and (vi) modern physics.

CLO4 demonstrate basic communication skills through discussions and writing of report within groups of 3-4 students.
