Application Dates:

Please contact us for more information

This program is an integrated program that combines all biological sciences, such as genetics, ecology, environmental science and biodiversity. We aim to develop and promote the skills and capacities of students to be recognized at international level as well as establishing collaborative academic and research activities with The State University of New York (SUNY), USA.

Activities:

- management and researcher
- in fields of innovation and development of natural products and bioactives
- scientists and specialists in governmental and private sectors
- inter medical schools and graduate schools in various fields in SUNY and other universities in USA
