

How to Open a Private/Incognito Window

Safari – Private Window

1. Open **Safari** on your Mac.
2. Click **File** in the menu bar.
3. Select **New Private Window**.
4. A new Safari window will open in **Private Browsing** mode.
5. Access the application website and try submitting your application again.

Shortcut: Press **Shift + Command (⌘) + N**.

Google Chrome – Incognito Window

1. Open **Google Chrome**.
2. Click the **three-dot menu (⋮)** in the upper-right corner.
3. Select **New Incognito Window**.
4. A new Incognito window will open.
5. Access the application website and try submitting your application again.

Shortcut: Press **Ctrl + Shift + N** on Windows, or **Command (⌘) + Shift + N** on Mac.
